

9. ตอบ

1.

```
class Language
def initialize(name, creator)
  @name = name
  @creator = creator
end
def description
  puts "I'm #{@name} and I was created by #{@creator}!"
end
end
ruby = Language.new("Ruby", "Yukihiro Matsumoto")
python = Language.new("Python", "Guido van Rossum")
javascript = Language.new("JavaScript", "Brendan Eich")
ruby.description
python.description
javascript.description
```

2.

```
class Person
def initialize(name)
  @name = name
end
matz = Person.new("Yukihiro")
end
```
